

Cornwall Airport Limited Board - Low Carbon Commitment

Cornwall Airport Limited (CAL) Board^{*1} commits the company to:

- Meeting or exceeding the 2020 Greenhouse Gas emissions target set by Cornwall Council; which equates to a **40% emissions reduction** in scope 1 and 2 emission from CAL by 2020^{*2}.
- Working with partners (i.e. tenants, airlines), in-order to develop and implement a '**Measure, Manage and Minimise**'^{*3} approach to Newquay-Cornwall Airport's carbon footprint.

Mr. Al Titterington. MD Cornwall Airport Limited

^{*1} The body responsible for overseeing CAL's performance in terms of carbon management and reduction.

^{*2} Absolute reduction in Co2e emissions measured against CAL's 2010 baseline data year.

^{*3} Definitions

CAL defines '*Measure, Manage, and Minimise*' as follows:

Measure: Produce annual greenhouse gas accounts in accordance with the ISO 14064-1 corporate reporting standard.

Manage: Develop, implement, monitor and review processes and systems for managing NCA's: energy, transport, waste and procurement greenhouse gas emissions, in-accordance (where appropriate) with the requirements of the Airport Carbon Accreditation (ACA) Scheme.

Minimise Engage in a process of continuous improvement, focused on reducing Newquay Cornwall Airport's carbon footprint, with the long term aspiration of achieving carbon neutrality (to the extent that reductions can be economically delivered).
